Instructions

If you are installing a winch. You will need the proper fairlead mount for your winch(purchased separately).

Follow instructions supplied with fairlead mount to install winch.

Remove factory fog light from mounting location. You will see two mounting tabs on the bottom of the light. Drill the holes on the bottom of the light out to 5/16".

Jeep
JK Front
Instructions

Mount the supplied steel mounting bracket to the light using 1/4" SS bolt and nut. Mount so the mounting bracket foot is facing the same direction as the light. Repeat on both lights.

The factory fog can be slid in between the back of the bumper and the factory crash bar, It fits through the best at the outer edge.

Once light is in the bumper it will mount to the bumper using two 1/4" SS bolts and nuts. Install the button head bolt from the bottom up through the light bracket, align and tighten.
